(54) Abstract Title

Vacuum cleaner

(57) A vacuum cleaner comprises a suction brush (20) movably disposed at a lower portion of a cleaner body (10), a by-pass motor (30) disposed in the cleaner body and generating a suction force at the suction brush (20), a cyclone dust-collecting apparatus (40) disposed in the cleaner body (10) and having an inflow passage (42a), into which air passing by the by-pass motor (30) flows, and an outflow passage (42b) through which the air cleaned by a separation effect of centrifugal force is discharged, and a dust bag (50) disposed in the cleaner body (10) and connected to the outflow passage (42b) for filtering minute dust entrained in the once cleaned air which is discharged from the cyclone dust-collecting apparatus (40).

FIG.3

GB 2 378 125 A

Vacuum cleaner
